I. Purpose and Overview

Creativity is a driving force in the 21st century global economy, with the fastest growing jobs and emerging industries relying on the ability of workers to think unconventionally and use their imaginations. Experience with and knowledge of the arts are essential components of the K-8 curriculum in the 21st century. As we work to transform public education to meet the needs of a changing world and the 21st century workforce, capitalizing on the unique ability of the arts to unleash creativity and innovation in our students is critical for success.

II. Mission

Empowering students to develop creative and critical thinking, social-emotional competencies, and intellectual and expressive abilities will allow them to become active, contributing members of a global society.

III. Vision

All students will have equitable access to a quality arts education that leads to artistic literacy and fluency as a mechanism for:

- Performing, presenting or producing, as artistically literate individuals, by expressing and realizing creative ideas and implementing essential technical skills and cognitive abilities significant to many aspects of life and work in the 21st century;
- Responding to artistic ideas and work with personal meaning and cognizance of the ability of the arts to address universal themes, including climate change;
- Creating new artistic work reflective of a variety of ethnic, racial, and cultural perspectives; and
- Connecting and evaluating how the arts convey meaning through all arts and non-arts disciplines and contexts of our global society.

IV. Assessment

Assessment is an essential element of effective instruction and is an ongoing process. Its primary purpose is to provide precise and meaningful data regarding student achievement of intended learning targets. Evidence of growth can be demonstrated in multiple ways throughout each unit. A variety of assessment formats have been developed, and current academic research is always at the forefront when assessing our students. Assessments include but are not limited to teacher-made tests and quizzes, observations, performance tasks, and rubrics. [Accommodations and modifications](#) are available for those students who demonstrate a need and can be located on the curriculum page of the district website.

**Sixth Grade
Unit 3
Aesthetic Responses & Critique Methodologies**

Desired Results

Goals:

1.1.8.Re7a: Use genre-specific terminology to compare and contrast recurring patterns of movement and their relationships in dance in the context of artistic intent.

1.1.8.Re7b: Use genre-specific dance terminology. Explain how the elements of dance are used and how they differ in a variety of genres, styles, or cultural movement practices to communicate intent. Use genre-specific dance terminology.

1.1.8.Re8a: Examine a dance and explain how artistic expression is achieved through relationships among the elements of dance, use of body, dance technique, and context. Interpret using genre specific dance terminology.

1.1.8.Re9a: Examine artistic criteria to determine what makes an effective performance. Consider content, context, genre, style, and /or cultural movement practice to comprehend artistic expression. Use genre-specific dance terminology.

Students will know and be able to...

Differentiate applications of the elements of dance (space, time, and energy) in self and peer-generated, teacher generated choreography and culturally diverse dance masterworks (e.g., Native American Indian Pow Wow ceremonial dances, Court Dances etc.) and apply these conventions to the performance of stylistically similar dances.

Examine the effect of specific cultural, religious, mythical or archetypal references on culturally specific dance forms.

Distinguish ways that the effort actions (gliding/floating, flicking/dabbing, thrusting/slashing, and pressing/wringing) are employed in culturally specific dances and use this information to inform emotional responses to cultural/historical dance works.

Contrast the major styles of Western Theatrical Dance (e.g., classical ballet, modern, classical jazz, Broadway tap, etc.) with non-traditional styles of dance (e.g., neo-classical and contemporary ballet; post-modern; jazz; rhythm tap; hip hop; world dance etc.) to identify and differentiate their cultural and technical elements. Study the effects of the elements of style in creating and expressing new, non-conventional ideas in teacher, self-generated or peer choreography.

Use rubrics and holistic scoring guides aligned to kinesthetic and anatomical principles as the basis for analysis of the formal structure and technical proficiency (e.g., dynamic alignment; balance; initiation of movement; and direction of focus etc.) self, peer and teacher generated dances as well as masterworks by professional dance artists (e.g., Rudolf Nureyev, Margot Fonteyn, Martha Graham, Merce Cunningham, Ann Reinking, Gwen Verdon etc.).

Differentiate between formal structures and technical proficiency in self-generated and peer produced performance works.

Interdisciplinary Connections

ELA: SL.PE.6.1. Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. Career Readiness, Life Literacies, and Key Skills

Career Readiness, Life Literacies, and Key Skills Practices: Model integrity, ethical leadership and effective management. 9.4.8.DC.7: Collaborate within a digital community to create a digital artifact using strategies such as crowdsourcing or digital surveys. 9.4.8.IML.1: Critically curate multiple resources to assess the credibility of sources when searching for information. 9.4.8.TL.2: Gather data and digitally represent information to communicate a real-world problem (e.g., MS-ESS3-4, 6.1.8.EconET.1, 6.1.8.CivicsPR.4). Activity: Use active listening and effective tone to participate in small group discussions regarding the dance and its meaning over the last hundred years.

9.2.8.CAP.3: Explain how career choices, educational choices, skills, economic conditions, and personal behavior affect income. Activity: Discuss the importance of communication skills in future careers.

Computer Science and Design Thinking

8.1.8.IC.1: Compare the trade-offs associated with computing technologies that affect individual's everyday activities and career options. Activity: Create a document to keep track of small group discussion notes.

Formative:

- Teacher observation
- Anecdotal notes

Summative:

- Task 1: Students will create, rehearse and perform a short small group (approximately 30 seconds in length) narrative dance work with a clear beginning, middle and end. Students will select a written source material (e.g., a short story, news event, poem, etc.), that will serve as a creative stimulus for their dance piece. The students must choose to apply either of the choreographic forms ABA or Call and Response to their piece. The narrative content of the dance must show a clear relationship to the source material.
- Task 2: After viewing a dance master work that expresses a position about a social theme, students will create, rehearse and perform a group dance composition (approximately 1 minute in length), that expresses a position about a social theme (e.g., harassment, bullying, cyber bullying, etc.). The students should include varied balances as well as variation in the elements of dance (space, time, and energy).
